

# Front End Web Development Internship Assignment

First of all, thank you so much for showing interest towards us and applying for the interest. We liked your profile and thought to proceed with our next interaction.

Here are some points we would like to share before directly go to the assignment.

- You can visit and check our current UI on diybaazar.com
- This was entirely developed from scratch (both front end and back end)
- We are looking forward to give it a creative dynamic and attractive make over.

What you will get from us –

- Immense learning.
- Work on real world product.
- Explore on new techs and develop something for broader audience.

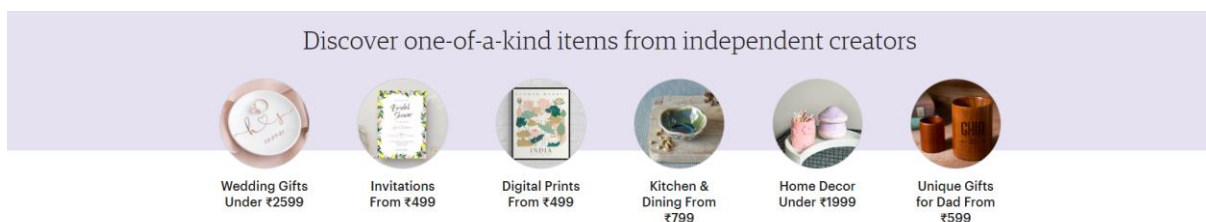

What are our expectations from you on this assignment.

- We will share some sample works and designs that we want you to design. We want you to be as much creative you can not just copy paste things.
- Your design has to be responsive. Means it has to be designed both for desktop and mobile (We are more interested in mobile view).
- Make sure whatever you are developing you understand and you will be able to customise on that area.
- Your eligibility will be decided based on both your coding style and creativity.
- For any doubt or query, you can contact us anytime at the given details.

## Assignments

### 1. One main slider page or similar like that

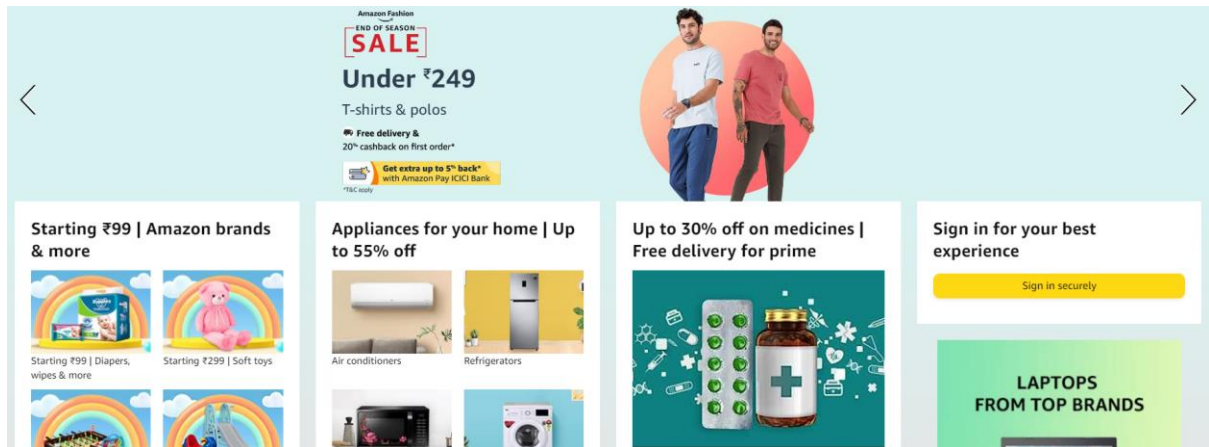

#### Example 1 -

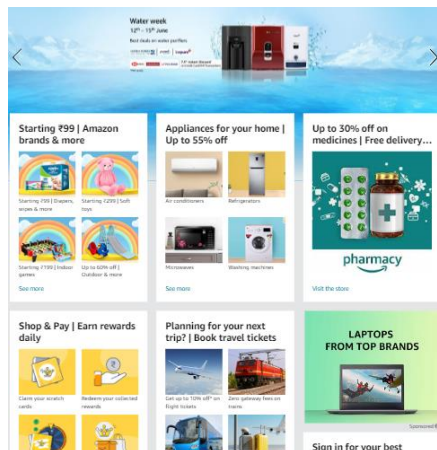

Phone view –

## Example 2 –

## Phone view –

## 2. A Slider for the Category page

### Example 1 –

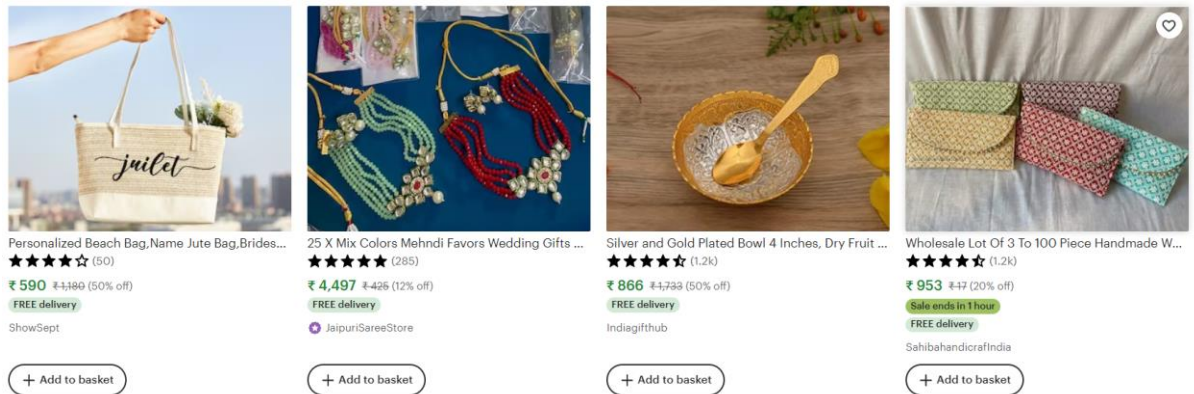

## Phone view -

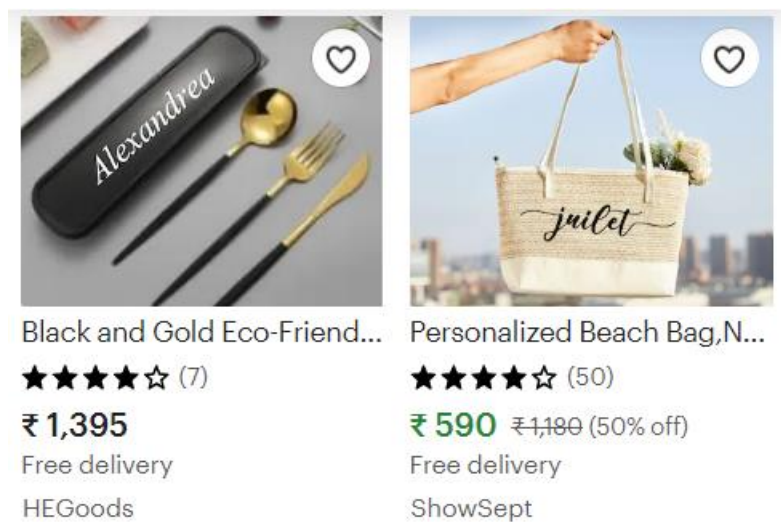

(this is a slider not static for phone view)

### 3. Product display page

Phone view –

Thanks again. Looking forward to connect with you again. :- )
